Summary

I am Muhammad Zeeshan Aslam, a Flutter developer with 2 years of experience creating professional Android, iOS, and Web apps. I deliver high-quality applications that meet Google and Apple guidelines, ensuring approval without risks. I specialize in responsive designs, seamless user experiences, and efficient performance. My services include Flutter Material Design, Firebase and Google API integration, user authentication, WebSockets integration, and complete API/database solutions. I also excel in optimizing apps, fixing bugs, and adding features like social media integration, push notifications, and Google Maps navigation for a polished and professional app.

Work Experience

FlutterFlow Developer   `4 months`

SOVANZA

Lahore City, Pakistan | Feb 2025 - Present

As a FlutterFlow Developer at Sovanza, I was responsible for designing and implementing visually appealing, responsive, and high-performance cross-platform applications. My key contributions included the development and integration of multiple innovative projects with API integrations, real-time map functionalities, and AI features:

- **Guider**
  Developed an intuitive guide and location-based application that helps users discover restaurants and places nearby. Integrated Google Maps to show live locations, track destinations, and manage visited, saved, and favorite spots.
- **Seria / Seria Pro**
  Worked on e-commerce functionality powered by **WooCommerce** and **Dokan APIs**, building digital marketing platforms that supported multi-vendor systems, product listings, and seamless user interfaces for sellers and buyers.
- **AI Dispatching**
  Integrated **Vapi APIs** to create an AI-powered assistant for dispatch operations. Built smart communication and task-handling workflows, allowing AI to manage dispatch processes, respond to queries, and perform automated actions efficiently.
- **DSCVR**
  A minimalistic place-guidance app with full **Google Maps** integration, enabling users to explore and navigate to specific locations with ease.

Flutter Developer | Team Tech Lead   `9 months`

WEB VISTA COMPANY

Lahore City, Pakistan | Sep 2024 - Present

Currently working on a social media application akin to Facebook, leveraging Flutter to create an engaging and user-friendly interface. Collaborating with a dynamic team to implement features that enhance user interaction and connectivity.

- Leading the development of major Flutter applications with a focus on performance and user experience.
- **Fitness App**: Designed and developed a health and workout tracking app.

iOS Deployment ▬▬▬

Certifications

- **Certificate of Achievement in Mobile App Development**
  Devsinn's Technologies | 2024
- **Flutter Developer**
  Devsinn's Technologies | 2023

Languages

- **Urdu** - Native
- **English** - Medium

- **Social Media App**: Built a full-featured social media app similar to Facebook, enabling posts, chats, profiles, and more.
- **Alarm App**: Developed a custom personal alarm/reminder app for a client.
- **Emergency SOS App**: Created an emergency alert app for quick SOS responses.
- Currently leading a team on a Facebook-like social media app to enhance user interaction and connectivity using Flutter.

Flutter Flow Developer   `5 months`
DEVSINN'S TECHNOLOGIES

Lahore City, Pakistan | Sep 2024 - Feb 2025
Developed **SendSorta**, an innovative parent-child control app that empowers parents to monitor their children's media consumption. Integrated an AI assistant to provide personalized insights and recommendations, enhancing family media experiences.
Developed **WeTeach App** like teaching student online app through Flutter Flow.

iOS Developer   `4 months`
FILES TECHNOLOGY & FILES STUDIO PVT LTD

Lahore City, Pakistan | Mar 2024 - Jul 2024
As an IOS Developer specializing in Flutter at Files Technology & Files Studio Pvt Ltd, I'm tasked with integrating third-party APIs into our game projects. Leveraging my expertise, I seamlessly incorporate Rapid APIs to streamline development workflows, ensuring rapid prototyping and efficient iteration cycles. Collaborating closely with cross-functional teams, I contribute to conceptualizing and implementing innovative game features. Through code reviews and knowledge sharing sessions, I foster a culture of continuous learning and improvement. Navigating complex technical challenges inherent in game development using Flutter, I maintain up-to-date knowledge of industry trends to drive innovation and maintain our competitive edge.

Flutter Developer / Mobile App Developer   `20 months`
DEVSINN'S TECHNOLOGIES

Lahore City, Pakistan | Dec 2022 - Aug 2024
As a Part Time Flutter Developer at DevsInn Technology, I excelled in creating high-performance, visually appealing mobile applications. I led UI/UX design implementation, integrated third-party libraries, and optimized app functionality for a seamless user experience. My role involved collaborating with cross-functional teams, staying updated on Flutter advancements, and contributing to a positive work environment.

Spot Brighton is a Flutter app for event management, built with Flutter Flow and Firebase. Features include browsing events, managing tickets, saving

favorites, and exploring venues/promoters. It supports secure email and Google authentication with real-time Firestore sync for a seamless user experience.

Bissi Player | Nov 2024 - Feb 2025 | https://apkpure.com/bissi-player/com.easething.playerbissi
BISSI PLAYER (PERSONAL CLIENT)
Tools: FlutterFramework, Flutter, VSCode, Android Studio, M3u Integration, Xtream Integration, ExoHomeTech APIs Integration, IPTV Server Integration

Developed a high-performance IPTV streaming application using **Flutter**. Integrated **M3U** and **Xtream APIs** for dynamic channel loading and streaming. The app includes:

- **ExoHomeTech API** and **IPTV server integration** for smooth video playback
- **VPN integration** for secure and region-free streaming
- Advanced **filtering system** to restrict 18+ content
- Built using **Flutter Framework**, **VSCode**, and **Android Studio** for cross-platform support

ONESEC | Jul 2024 - Oct 2024 |
https://github.com/zeeshandevsinn/ONESEC
ONESEC COMPANY (KARACHI)
Tools: Postman integration, Rest APIs, Dart, Model View Controller, Responsive Design , Andriod App

OneSec is a versatile mobile application designed to enhance interaction between companies, individuals, and employees. The app integrates a range of advanced APIs, along with essential design elements, to provide a robust platform for data visualization, location services, and analytics. It features Google Maps for precise location tracking, world maps for global insights, and bar charts for visualizing key metrics. OneSec allows companies to manage profiles, track performance, and interact with employees, while individuals can create personal profiles and explore career opportunities. By bridging the gap between these three categories, OneSec offers a comprehensive solution for managing relationships and data in a dynamic business environment.

MONEY MANAGER APP | Jun 2024 - Jul 2024 |
https://github.com/zeeshandevsinn/Money-Manager-App
CHORIZNOOB31@GMAIL.COM
Tools: Firebase Authentication, Firebase Storeage,Firebase Firestore,C++, Provider, Dart language, Flutter framework development

Deployement on:
Adriod + iOS App.
We Manager User Wallet of Expanses and Balance by adding his daily or monthly or routine wise expense and we track user from authentication with email and phone otp.
We use Firebase Console for Backend and using Flutter Frameworks.
We Face many Errors in Xcode but I am not forget this project for these error i am still on working as alone no body can help me but until after 10 days i won to made build and knock the door of client and said that your app has been ready come and push it on your app test flight account.
This is my first achievement.

Soccer Sphere Insights | May 2024 - Jun 2024 |
https://github.com/zeeshandevsinn/Soccer-Sphere-Insights
PERSONAL
Tools: Rapid Hub APIs, SharedPrefrences, C++, Dart and Flutter Framework Development

The Soccer Sphere Insights App leverages real-time APIs to deliver comprehensive soccer analysis. It provides live match updates, player performance analytics, team statistics, and tactical insights, empowering coaches, analysts, and sports organizations with actionable data. Originally a

personal project, now commercially available.

United-Proposal App | Dec 2023 - Feb 2024 |
https://github.com/zeeshandevsinn/United-Proposals
DEVSINN'S TECHNOLOGIES
Tools: Firebase Authentication, Firebase Storeage, Dart language, Flutter
        framework development, FirebaseFirestore, GetX, Provider, Consumer,
"United-Proposal is an innovative app, designed on the Flutter framework and
seamlessly integrated with Firebase, aimed at facilitating meaningful
connections akin to Rishta.com. Harnessing the power of Flutter's versatile UI
capabilities, the app offers a user-friendly interface, ensuring a smooth
experience for users seeking compatible matches. Leveraging Firebase
integration, United-Proposal efficiently retrieves user data, fostering a secure
and reliable platform for individuals to discover and engage with potential
matches, promoting harmonious relationships and connections."

Bhai Chara App | Sep 2023 - Nov 2023 |
https://github.com/zeeshandevsinn/bhai-chara
PERSONAL PROJECT
Tools: Firebase Authentication, Firebase Storeage, Dart language, Flutter
        framework development

"**Bhai Chara:** More than a marketplace, it's a movement! Buy, sell, and
donate on this unique platform designed for freedom users. Join a community
dedicated to making a positive impact. Your actions matter—shop with
purpose, sell with heart, and donate with impact. Experience the power of
giving, one transaction at a time. Bhai Chara—where commerce meets
compassion."
